

## Why Choose Us?

- 1** We specialize in the design, development, and deployment of drones for real-world applications like surveillance, mapping, and monitoring.
- 2** Our solutions are built to solve specific challenges in different industries, ensuring maximum impact and field-readiness.
- 3** We actively collaborate with institutions and agencies to build scalable drone systems that can be customized for diverse missions and environments.

## About Us

At Bhodhristi Pvt. Ltd., we are focused on leveraging AI-driven drone technology to optimize industrial operations.

Our drones provide precise real-time data, empowering industries to enhance their resource management and decision-making processes. Through advanced aerial systems, we bring innovation to traditional practices, ensuring better productivity and smarter operations.

## Services

Customised Drone Design and Development

Drone Integration and Deployment Support

Aerial Survey & Geographical Mapping Solutions

## Achievements

- Second Place at Amaravati Drone Summit 2024.
- Second Place at Global Hackathon (hosted by TUM Denmark)

“  
**Empowering Industries with  
Innovation, and AI-Driven Excellence.**  
”

## What We Offer?

- High Performance UAVs built for specific use cases such as surveillance, surveyance, agriculture, and infrastructure monitoring
- Custom software leveraging AI to generate 3D maps, segment stockpiles, and conduct volumetric analysis tailored to specific user needs.
- Expert guidance on adopting drone technology for organizations, including feasibility studies, use-case analysis, and project planning.

## Our Mission

- 1 Provide reliable drone-based surveillance to minimize human risk in hazardous environments.
- 2 Build intelligent, industry-specific drone solutions using cutting-edge technology.
- 3 Enable large-scale operations to become more data-driven, responsive, and future-ready.
